

Hello all,

The **GILIS16** Difference Tables and Group Quarters tables are ready for you to start reviewing. You can get them here: https://mapsrv.co.clark.nv.us/incoming/compplanning/DiffTables_2016/

To find your tables, just look for your area name, for example diffTable_BoulderCity.xlsx, GrpQtrs_BoulderCity.xlsx.

I only included the columns that you are interested in for review purposes. Please do not modify any shaded fields in these tables as the shaded fields will not be reviewed again. Also, please do not change any other formatting on these tables.

This year the AOLANDUSE and therefore the SET_PGLU columns are numbers. In the past they were text fields that held numbers. So, on the tables you will not see the little green handles (text fields) that they had in the past. There should be no difference on how you use them.

Difference Reports:

Please only make changes in the diffTables to the following two columns:

SET_PLU for updating PGLANDUSE

SET_PGCAP for updating PGCAP

Whatever you have in SET_PGLU and SET_PGCAP when you return them to me will be coded into the PGLANDUSE and PGCAP fields of GILIS respectively.

I have already coded in the existing Assessors values for these, so if you don't have to make a change from a value, just leave it as is; hopefully that will be the case for most of them. Otherwise change the SET_PLU and/or SET_PGCAP value to be what you want it to be changed to based on your research.

As a side note, even though the official Roll Close data just became available, the official date is around July 1 so keep that in mind when considering changes.

Also, if the land use is 110 but you consider it to be a mobile home of some type (180, 185, 188), consider not changing it. If you do you will most likely have to look at this on your reports in subsequent years as the Assessor's office does code them that way for their own reasons for appraisal.

Group Quarters:

For the Group Quarters, I gave you a list of what you had for Group Quarters last year. Please change ONLY the GRPQTRS number if it needs to be changed by updating the number for that row. If it is no longer a GrpQtr, do not remove the row, just change the number to a zero for that one. If you need to add in additional ones, you may add

them immediately below the last item on the list. In this case I only need a **valid parcel number** and the number of GrpQtrs. You can leave everything else blank.

To download, use this link: https://mapsrv.co.clark.nv.us/incoming/complanning/DiffTables_2016/

Select the one you want, right click and select "Save Target As" and save it to your work area. Repeat for each file you wish to save.

Please do not add any additional notes or extra columns to the tables that you will return to me.

Any question, let me know.

Thank you,
